**Panel 1:** I have just heard about "Creative analytics" from Nissatech, and they say that I can use my full creative potential! How can that be if I am SO BIG and tough to deal with, hm !?
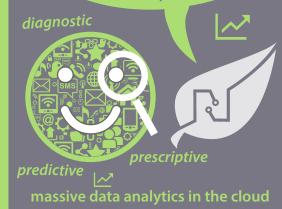

?

Panel 2: It is true! We developed an innovative solution that can process a huge amount of data in real time. Sources can be: fast industry sensors mobile phones, wearables...

t sec m hr tweets

thousands events per sec on edge

Panel 3: You will be surprised with what we can do with you! Try if you dare! For example, we can discover various anomalies hidden inside you, find the root cause for them and predict how they will influence everything around you.

diagnostic

predictive prescriptive

massive data analytics in the cloud

Panel 4: Now, with our help you can become creative and also help your friends to understand where and why there are problems or opportunities in processes and help them make innovative decisions to improve the business models!
