

Hey there smart one,  
this is your lucky day because  
we @ Nissatech might just have  
the solution that can make you  
even smarter and make you  
use your full potential.

CONTEXTUALIZATION

All the data you collect  
could be processed in real time and  
combined with past data, even from  
different sources. This way, your data  
will be placed in the context and  
will have higher significance  
as part of Big Data.

BIG PERSONAL  
DATA

RECOMMEND

Engagement with IoT  
 nissatech.com

But all this Big Data and  
context are not just there to inform us.  
We can use them to create smart  
notifications, recommendations and  
all sorts of user defined rules.

ALARMS

PERSONAL ALARMS

This is not only suitable for  
personal, every day Big Data  
management, but also in the domains of  
healthcare, long term care, fitness,  
corporate wellness, logistics and etc.  
Smartly improve efficiency  
and create value.
